Response to Arguments

1. Applicant's arguments with respect to claims 1-8 and 10-12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

a. Claims 1-8 and 10,12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zheng. Zheng discloses all of the limitations of the invention including a sheet 74 except for the arch angle and length/width dimensions. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to modify the device of Zheng by creating a arch of approximately 30-180 degrees and specific length and width because Applicant has not disclosed that a square shape provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with arch of any degrees and any length and width because the degree of the arch serves no mechanical function and are capable of performing in the same capacity as any degree. Therefore, it would have been an obvious matter of design choice to modify Zheng to obtain the invention as specified in

Art Unit: 3764

claims. It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations.

Ex parte Masham, 2 USPQ2d 1647 (1987).

b. Claims 1 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shu. Shu discloses all of the limitations of the invention including except for element being comprised of elastomeric material. The Applicant should note that the selection of a known material based upon its suitability for the intended use is a design consideration within the skill of the art.

In re Leshin, 227 F.2d 967, 125 USPQ 416 (CCPA 1960).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the similar references on Form 892. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3764

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
